

# This is our same day meetup-event format for women

1. Share your free times in the app so we can match you with a pod of women nearby 😊
2. Unlock the pod by tapping **invite** and DMing another woman with the template message 💬✨
3. Reply to messages and show up—active, reliable members get priority for pods

# How To Message People

- Message people and respond to DMs. Did someone say yes they were coming, provide attendance feedback afterwards.
- We prioritize adding women to event pods who are reliable, so you have higher confidence people will show up

# Common questions and answers

## **Is this better than other free event apps?**

- > YES! Other apps give you no event details, no help organizing, just chat groups! We do more to help group women at the same venue at the same time than most.
- > Most social apps are full of men who use them like dating apps, we do women-only for a reason.
- > Events with hosts cost money, it's also hard to get people to pay for events, hence hosted events are hard to find.

## **Do I have to join an event myself?**

- > No, we auto-add you to pods, based on your provided availability.

## **How can I find events?**

- > Tap your neighborhood and join an upcoming event pod

## **What do I talk about when I meet people?**

- > Add weekly travel destinations to your profile see shared travel destinations with other women for discussion points before meeting
- > Add business ideas or links to your external business landing pages on your profile

## **What if I message someone and they don't show up?**

- > Update their attendance feedback, flaking is not cool

## **I message people and they don't respond?**

- > We add recently active members to pods
- > We record reply rates, and prioritize adding women to pods with good reply rates
- > Responding is important and easy, just tap a button to respond

## **This app is boring, I want fun adventures instead?**

- > yes this is our main product, we let you buy and sell weekend trips other women can join
- > create your custom itinerary using our site and share it with other women
- > join with other women you have met at local pods

# Try and be considerate about this

**This app is a development project, all apps look like this to start with, we removed the men so women will participate - concerns about safety should not exist.**

**We are giving you more than nothing, and it's not costing you anything.**

Thank you for providing feedback, this has helped us make changes to what we can give you, please provide any usability feedback you have with the app, it won't get better otherwise.

Remember, send DMs, respond to DMs, we try to reduce visibility of profiles that don't participate, but go into this with the intention of trying to meet women in your neighborhood.
